

Adam Weber

262-646-0336 | adamweberbusiness@gmail.com | <https://zaidis.github.io/>

Ambitious Software developer with experience in Game and Backend Web Development who is skilled in collaborating in cross-functional teams to create innovative and exciting experiences for all audiences.

Professional Experience

Solo Indie Developer - Project Owner, Developer, Publisher

Feb 2024 - Today

- Designed, proto-typed, and created [Runeforged Monolith](#) using Unity. Developed all code and art assets
- Implemented a procedural map generation system, deck building system with card interactivity, save and load feature, dynamic tower placement and upgrading system, and several unique classes
- Managed playtesting and QA to establish organized bug fixing.
- Showcased at MDEV 2025. Deployed demo to Steam Next Fest. Used Davinci Resolve for marketing

Filament Games - Game Engineer I, Madison, WI

July 2022 - Jan 2024

Project CASA is a game built in the Unity Engine using C# that utilizes a web server using TypeScript. CASA was designed for researchers and teachers to test various skills within 3 - 5 year old children using different user inputs in a fun game environment. CASA used a "CAT algorithm" which evolves the test based on score.

- Engineered a Unity App from start to finish and worked alongside artists, producers, designers, and UX in an agile environment. Worked closely with clients to ensure the product was sufficient
- Created a server back-end using TypeScript that was in charge of all CAT algorithm calculations given by researchers for information sent by the Unity App via socket.io
- Implemented custom built RESTful APIs that controlled information between user input from the Unity App into the server back end. This information was utilized by a Prisma database for the researchers
- Developed the game's training system that allowed the students to learn how to play the game through a custom story without being connected to the web server

Skills

- Languages: **C#, TypeScript**, Java, HTML/CSS, GDScript
- Tools: **Unity Engine**, Godot Engine, Docker, Postman, Jira, Github, Gitlab
- Soft Skills: Attention to Detail, Critical Thinking, Adaptability, Time Management, Teamwork

Education

University of Wisconsin - Whitewater, Bachelor of Science,

2018 - 2022

Double Major: Computer Science, Media Arts and Game Development

Honors: magna cum laude

Awards

- Awarded **Best in Show** at the MAGD Expo 2020 - Split
- Awarded **Best in Show** at the MAGD Expo 2022 - Mythos
- Awarded **First Place** of the IGDA Foundation Game Jam 2022 - Crafted Chimera
